## **Drawings**

1. Figure 1 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated (specification, page 11, line 7). See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

## Claim Objections

2. Claims 12-18 are objected to because in claims 12 and 18, last line, "maximum/minimum" should be --maximum/minimum amplitude-- for clarity (specification, page, 17, lines 14-16). Appropriate correction is required.

### Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Application/Control Number: 10/639,926

Art Unit: 2666

Page 3

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Fujioka (US 2002/0193073).

- 3. Regarding claim 1, Fujioka discloses a method of plesiochronous synchronization of several subscriber networks (fig. 1, slave terminals) to a hub network (fig. 1, master terminal), each subscriber network includes a sub's clock and the hub has a hub's clock (para. 44, lines 27-28). The method comprises broadcasting control data from the hub network to each sub network (para. 57, lines 1-4; para. 56), transmitting back to the hub network a first sub's ID number (para. 44, lines 4-7 and 21-23) and waiting for the hub's instructions to burst back (para. 44, lines 29-31), bursting data from the hub network to a first sub network having the sub ID (para. 44, lines 23-25), acquiring a hub frequency by the first sub network having the sub ID and locking the frequency on the hub frequency and re-adjusting the sub frequency to be equal to the hub frequency (para. 44, lines 27-28), and repeating the synchronization steps for other sub networks (para. 44, last three lines).
- 4. Regarding claims 2-3, a training burst to at least one previously installed user is used to acquire and lock to the hub frequency (para. 57, lines 1-5 and 17-23; para. 51, lines 1-8).

## Allowable Subject Matter

- 5. Claims 4-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 6. Claims 12-18 are objected to but would be allowable if rewritten to overcome the above claim objection.

Art Unit: 2666

#### Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin Harper whose telephone number is 571-272-3166. The examiner can normally be reached weekdays from 11:00 AM to 7:00 PM ET.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Seema S. Rao, can be reached at 571-272-3174. The centralized fax number for the Patent Office is 571-273-8300. For non-official communications, the examiner's personal fax number is 571-273-3166 and the examiner's e-mail address is kevin.harper@uspto.gov.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications associated with a customer number is available through Private PAIR only. For more information about the PAIR system, see portal uspto gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
